# **Education**

**Baylor University** - Bachelor of Science in Computer Science

2008 - 2013 Waco, TX

# **Work Experience**

#### **Dell Technologies** - Performance Engineer

April 2016 to January 2022

Round Rock, TX

- Performance Testing lead for the Dell Sales Application, Dell.com Support portal, and Dell Solutions Configurator
- Designed and executed server-side performance tests with Neoload and client-side tests with Selenium
- Identified and analyzed performance bottlenecks using APM tools and presented results to development team leads and directors
- Performed RCA on memory leaks using WinDbg, DebugDiag, and ANTS Memory Profiler
- Collaborated with global team members to complete end-to-end performance tests in production to certify applications for Black Friday and Cyber Monday sales events
- Mentored new team members on tools and processes used for performance testing
- Extended and maintained a Windows Forms based application that automated day-to-day performance testing tasks
- Maintained a TFS work item automation tool used to create and track performance testing engagements
- Sysadmin for the Performance Team's Neoload Repository and Neoload Team Server

#### Sogeti - Consultant

January 2014 to April 2016

Austin, TX

- Reviewed application features with product teams at Dell and carried out performance tests on back-end web services that support Dell.com and offline sale tools
- Analyzed test results to identify bottlenecks and presented results to product team leads
- Automated an excel based test report saving ten minutes of manual work per report generated
- Developed an ASP.NET MVC based web tool to compare test results with established baselines

# **Texas Farm Bureau Insurance** - Software Programmer Intern

June 2013 to October 2013

Waco, TX

- Designed, implemented, and executed unit and load tests against web services that supported the customer web portal
- Implemented and executed Coded-UI tests against SharePoint 2013 web pages
- Deployed and maintained a continuous integration environment using Microsoft TFS
